—•—
O VISUAL É NOVO,
A QUALIDADE *você* CONHECE.

ASSIM SE FAZ UM LÍDER.

Há mais de 60 anos, a marca Tecfil é sinônimo de conhecimento, tecnologia e qualidade na produção de filtros. Com duas unidades fabris e alta capacidade de produção, somos a maior fábrica de filtros da América Latina, com estrutura capaz de produzir mais de 70 milhões de filtros por ano.

Para escoar toda esta produção contamos com um Centro de Distribuição com 25.000m² de área total, encarregado de abastecer todo o mercado nacional e internacional.

Contamos ainda com um centro tecnológico equipado com laboratório e área de protótipo, assim, agregamos alta capacidade de desenvolvimento e tecnologia aos nossos produtos.

Trabalhamos para reduzir impactos ambientais, tanto na produção de filtros ecológicos (sem o uso de aço), como nas atitudes para a preservação do meio ambiente.

Nossa equipe é formada por mais de 1500 colaboradores empenhados em cumprir a missão de levar ao mercado filtros automotivos de qualidade.

Esses detalhes e a excelência dos nossos produtos, fazem da Tecfil a marca líder em filtros automotivos e em todos os segmentos em que atua.

Filtros
Tecfil[®]

Originalmente líder.

TECNOLOGIA PARA GRANDE DESEMPENHO E MUITA ECONOMIA

Todos os filtros TECFIL são produzidos com alto padrão de tecnologia para garantir o melhor rendimento do veículo, economia e redução de impactos ao meio ambiente. Para obter sempre os melhores resultados, **siga as orientações do manual do veículo** em relação a troca dos filtros de ar, combustível e óleo.

Linha Leve

SAIBA MAIS

FILTRO DE AR

Os motores de combustão precisam da entrada de ar limpo para obter um funcionamento perfeito, por isso, o filtro de ar é parte vital no processo de filtração de partículas indesejadas. Sua principal característica é reter as impurezas do ambiente externo deixando o motor em condições ideais. Trocar o filtro de ar no momento certo evita ainda o consumo excessivo de combustível, o superaquecimento do motor, a perda de potência e o aumento de emissão de gases poluentes pelo escapamento.

FILTRO DE COMBUSTÍVEL

O filtro de combustível liga o tanque de combustível ao motor e é classificado como item de segurança. Sua função é filtrar o combustível antes que ele chegue ao motor. Os filtros de combustível TECFIL garantem maior vida ao sistema de injeção e carburação, eliminando partículas indesejadas como pó, ferrugem e resíduos do tanque, garantindo o pleno funcionamento do motor e reduzindo custos com manutenção corretiva.

FILTRO DE ÓLEO

É um item de alta importância para o perfeito funcionamento do veículo. Sua principal função é impedir a passagem de partículas prejudiciais (provenientes da fricção das peças) para o motor, evitando assim desgastes excessivos e prematuros dos componentes internos durante seu funcionamento. Os filtros de óleo TECFIL são projetados para atender as exigências dos mais diferentes tipos de motor, proporcionando assim o melhor rendimento com a maior segurança.

A QUALIDADE QUE É LÍDER E CERTIFICADA

Para atender com excelência o mercado automotivo, a **TECFIL** possui todas as certificações de sistema da qualidade: ISO9001, ISO/TS16949, ISO14001, OHSAS18001.

Isso é resultado de investimentos contínuos em tecnologia e programas internos de qualidade. Assim, quando os filtros **TECFIL** saem da fábrica, eles já estão prontos para suprir as necessidades e exigências do mercado com a mesma durabilidade e segurança do produto original.

RESPIRE SAÚDE E PROTEJA SUA FAMÍLIA. FILTRO DE AR CONDICIONADO/CABINE TECFIL

Não é somente a saúde do veículo que se beneficia com a utilização correta dos filtros. Os filtros de ar condicionado/cabine estão totalmente ligados à saúde dos ocupantes dos veículos, ou seja, sua e de sua família. Sua principal função é reter impurezas contidas no ar como poeira, fuligem e gases (substâncias que causam problemas de saúde principalmente para pessoas com asma e alergias), garantindo que o ar

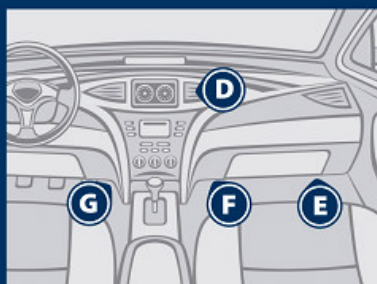

chegue mais puro ao interior dos veículos. Os filtros de ar condicionado/cabine TECFIL possuem "Tratamento Corona", uma tecnologia que permite aplicar cargas elétricas controladas na mídia plana sintética gerando um campo eletrostático em seu meio, aumentando o poder de captação das partículas e garantindo a circulação de um ar mais puro no interior do veículo por muito mais tempo.

VEJA COMO LOCALIZAR O FILTRO DE AR CONDICIONADO/CABINE TECFIL NO VEÍCULO

- A. Embaixo do capô**
(lado passageiro)
- B. Embaixo do capô**
(centro)
- C. Embaixo do capô**
(lado motorista)

- D. Atrás do porta-luvas**
Desparafuse e retire o porta-luvas. Abra o compartimento do filtro, localizado do lado esquerdo, com a chave apropriada.
- E. Embaixo do porta-luvas**
Não é necessário retirar o porta-luvas.
- F. Embaixo do porta-luvas à esquerda**
Não é necessário retirar o porta-luvas.
- G. Embaixo do painel**
Próximo ao acelerador

TROCA NA HORA CERTA, A GARANTIA DO MELHOR RENDIMENTO.

Os filtros tem função fundamental para preservação da saúde do veículo e dos seus ocupantes. É muito importante que as trocas sejam feitas de acordo com as recomendações do manual do fabricante e as condições de uso de cada veículo.

Listamos abaixo uma sugestão para troca de cada tipo de filtro e os problemas que podem ocorrer caso esse prazo não seja cumprido. Lembrando que o manual do veículo deve sempre ser consultado:

FILTRO DE AR

TROCA: Cerca de 10 mil quilômetros, em média. Atenção: A troca do filtro de ar está relacionado ao ambiente de trabalho (condições severas ou normais). Os filtros do ar nunca podem ser limpos com jato de ar, isso irá romper os poros do meio filtrante.

O QUE PODE ACONTECER: O excesso de sujeira faz com que o propulsor tenha que fazer mais força para puxar o ar, isso ocasiona no aumento do consumo de combustível e permite a entrada de impurezas que atingem o motor.

FILTRO DE COMBUSTÍVEL

TROCA: Entre 10 mil e 15 mil quilômetros, em média.

O QUE PODE ACONTECER: Pode comprometer a bomba de combustível e sujar o sistema de injeção, principalmente os bicos injetores. Provocando falhas e afetando o rendimento do motor.

FILTRO DE ÓLEO

TROCA: Sempre que fizer a troca de óleo, em média entre 7 mil e 15 mil quilômetros.

O QUE PODE ACONTECER: Deixará partículas no motor que vão danificar peças como: pistões, cilindros, anéis, válvulas e mancais. Em situações extremas pode fundir o motor.

FILTRO DE AR CONDICIONADO/ CABINE

TROCA: Não há prazo por quilometragem, a troca deve ser efetuada de acordo com a utilização do veículo. Por isso, é necessário fazer uma checagem a cada 20 mil quilômetros.

O QUE PODE ACONTECER: O filtro não irá impedir a entrada de resíduos na cabine, causando desconforto e comprometendo a saúde dos ocupantes do veículo.
